

Values

- Excellence will remain the benchmark to which we will measure our performance within each Business unit, Department and Project.
- Respect for our clients, our colleagues and communities we operate in and their diversity as well as the environment.
- Service Orientated Approach providing our clients, colleagues and partners with the necessary support to achieve our collective goals.
- Teamwork. Through a combined effort and co-operation, we will achieve more than we could as individuals, relying on the combined talents and strengths of the team.
- Integrity in all aspects of our operations demonstrating honesty, transparency and accountability.
- Value Addition in all activities we undertake in ensuring quality of delivery and performance to the satisfaction of all clients both external and internal

CONSTRUCTION
EXCELLENCE

We strive to provide
professional construction
and project management
solutions.

ABOUT OUR COMPANY

History

RRD Construction (PTY) Ltd is a company formed by skilled and experienced engineers in the mining and construction industry. The management of RRD Construction is committed to providing clients with excellent customer service. We are committed to resource, implement, and maintain an effective Quality Management System.

BEE Status

RRD Construction (PTY) Ltd is a 100% black owned BBBEE Company, and is committed to Broad Based Black Economic Empowerment. We are committed to the South African BBBEE policy. We believe that BBBEE is an integral driver of economic and social transformation in South Africa and therefore an integral component of our business. We are committed to an ownership and control structure that is consistent with the vision and objectives expressed in the government Broad Based BBBEE Strategy.

Safety Statement

RRD Construction (Pty) Ltd is a construction company conducting business in the civil, building, roads, earthworks and mining sectors.

Vision

To expand our current market share in the building and construction industry by providing vital solutions in an ethical, profitable, growth oriented manner.

Approach

Effective and Efficient interaction with clients in order to identify opportunities for value addition.

Mission

To execute building and civil projects in order to add value to the communities we serve

QUALITY STATEMENT

At RRD Construction we strive to provide professional construction and project management solutions. Quality to us means:

- Delivering reliable solutions by ensuring our projects and services match modern quality standards and best practices.
- Delivering construction and project management solutions that add value to our clients' strategic and operational goals.
- Providing services driven by customers' needs in order to build long term relationships.
- Build and maintain strong supply chains with various specialist service providers with expertise in divisions of engineering and environmental management.
- Exceed our own Quality Objectives.
- Employ competent staff in order to deliver excellent service to our clients.
- Always acting with the highest level of integrity.

The management of RRD Construction is committed to providing clients with excellent customer service, management is committed to resource, implement, and maintain an effective Quality Management System in line with the requirements of ISO 9001 standard.

SERVICES

We offer construction services in the following areas:

Civil works

RRD has extensive experience in placing of structural concrete for intricate and sophisticated designs. This is key to the successful construction of any major structure where concrete is a crucial design element. In many major projects where concrete is the major structural element, safety and quality are paramount for the long-term use of that structure. We are equipped to do site grading, ditching, drainage, land clearing, add top soil and fill dirt, wrecking and demolition for residential, commercial, and industrial projects.

- Concrete slabs and foundations
- Pipelines and pump stations
- Bulk earthworks
- Mine plant and infrastructure civil works

Building works

The complexity of the modern building process demands qualified professionals with special abilities to analyse, clearly identify challenges and provide solutions as the project develops. RRD has the capacity to build:

- Offices
- Commercial buildings
- Warehouses
- Residential
- Retail
- Healthcare and pharmaceutical
- Leisure and recreation

Infrastructure

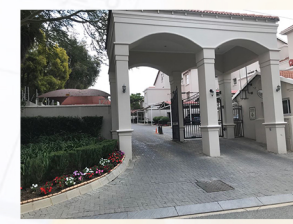

- Schools
- Hostels
- Clinics
